I. INTRODUCTION

A. General

It is the policy of the State of South Carolina to be prepared for any emergency or disaster. Emergency response personnel, equipment, and facilities will be maintained in a state of readiness to save lives, prevent or minimize damage to property, and provide assistance to all people who are threatened by an emergency or who become victims of any disaster. Emergency operations will be coordinated to the maximum extent with comparable activities of local governments, other states, the federal government, and private agencies of every type. The level and duration of state commitment of resources shall be determined by the Governor.

B. Specific

1. This plan establishes the policies and procedures by which the State will coordinate state and federal response to disasters impacting South Carolina and its citizens.

2. It describes how the State will mobilize resources and conduct activities to guide and support local emergency management efforts through preparedness, response, recovery, and mitigation planning.

3. It utilizes the Emergency Support Function (ESF) concept to marshal and apply state resources and describes the responsibilities of state agencies in executing effective response and recovery operations.

C. Mission

State government has a five-fold mission:

1. To warn of impending danger;

2. When required, support local government disaster operations with timely, effective deployment of state resources;

3. Through the public information process, keep affected residents informed about the situation and how they can protect themselves;

4. Coordinate and direct restoration and recovery operations when local government resources are exhausted; and
5. Assess local needs and coordinate support from adjacent states and the federal government as necessary and appropriate.

D. Emergency Management Planning Responsibilities

1. Mitigation activities are those that either prevent the occurrence of an emergency or reduce the community's vulnerability in ways that minimize the adverse impact of a disaster or emergency.

2. Preparedness activities, programs and systems are those that exist prior to an emergency and are used to support and enhance response to an emergency or disaster. Planning, training and exercising are among the activities conducted under this phase.

3. Response involves activities and programs designed to address the immediate and short-term effects of the onset of an emergency or disaster. It helps to reduce additional casualties and damage and to speed recovery. Response activities include warning, direction and control, evacuation, and other similar operations.

4. Recovery involves returning systems to pre-disaster conditions. Short-term recovery actions are taken to assess damage and return vital life-support systems to minimum operating standards; long-term recovery actions may be continued for years.

II. SITUATION AND ASSUMPTIONS

A. Situation

1. Vulnerability Analysis (Demographics)

South Carolina's population was estimated 4,063,000 in 2001 US Bureau of Census). The population is projected to be close to 4.3 million by July 1, 2005. In addition to the permanent residential population, millions of tourists visit the State each year. As the twenty-sixth most populated state in the nation, combined with such a huge tourist population, South Carolina can experience a loss of life and property of catastrophic proportion due to an array of hazards. The following statistics illustrate the vulnerability of the state's population:
a. Forty-one (41) percent (1,661,200) of the state's total population resides in the 23 coastal and low country counties.

b. Twenty (20) percent (823,000) of the state's total population were estimated to reside in mobile homes in 2001.

c. Twelve (12) percent (487,600) of the state's total population is 65 years of age and over.

d. Tens of thousands of persons have special medical or dietary needs requiring special sheltering assistance.

e. Over 30 million tourists visit the State annually.

2. Hazard Analysis

South Carolina is threatened by natural and technological hazards. The threat posed by these hazards is both immediate (e.g., hazardous chemical spill, hurricane, tornado) and long-term (e.g., drought, chronic chemical release). These hazards have the potential to disrupt day-to-day activities, cause extensive property damage, and create mass casualties. Historically, the greatest risk was perceived to be from natural hazards (e.g., hurricanes, tornadoes, severe storms, floods, earthquakes). However, the continued expansion of chemical usage is raising the risk posed by technological hazards (e.g., hazardous chemical releases/spills) in South Carolina. Possible hazards include:

a. Hurricanes and Tropical Storms

South Carolina is one of the most vulnerable states in the nation to be impacted by hurricanes and tropical storms. Of the state's 46 counties, 6 have coastlines, which border the Atlantic Ocean. These counties have over 200 miles of general coastline and all inland counties may be directly affected by these storms. Densely populated coastal areas, especially during peak tourist seasons, coupled with the generally low coastal elevations, significantly increase the state's vulnerability. The greatest threat to life and property associated with a hurricane and tropical storm is storm surge. Other effects include high winds, tornadoes, and inland flooding associated with heavy rainfall that usually accompanies these storms. More detailed information can
be found in Attachment B, Annex 25 of this document and the South Carolina Hurricane Plan.

b. Tornadoes

South Carolina has averaged 11 tornadoes each year since 1950, resulting in 47 fatalities and 1,057 injuries. South Carolina ranks twenty-sixth in the United States in the number of tornado strikes, and eighteenth in the number of tornadoes per square mile. The most common type of tornado, the relatively weak and short-lived type, occurs between March and May. Tornadoes are most likely during the Spring, but can occur almost anywhere at anytime.

c. Coastal and Riverine Flooding

(1) In South Carolina, several variations of flood hazards occur due to the different effects of severe thunderstorms, hurricanes, seasonal rains and other weather-related conditions. The State's low-lying topography, combined with its humid subtropical climate, makes it highly vulnerable to inland or riverine flooding. Riverine flooding occurs when the flow of rainwater runoff is greater than the carrying capacities of the natural drainage systems. One of the most destructive riverine floods in South Carolina, based on the area affected, was the 1903 flood. Heavy rains associated with a low-pressure system and an upstream dam failure caused this flood. The textile communities of Clifton and Pacolet were hardest hit. The Pacolet River rose as much as 40 feet in an hour, resulting in the deaths of sixty-five people.

(2) In comparison to riverine flooding, coastal flooding is usually the result of a severe weather system such as a tropical storm, hurricane, or intense offshore cyclone, which contains an element of high winds. The damaging effects of coastal floods are caused by a combination of storm surge, wind, rain, erosion and battering by debris. In 1999, three tropical systems resulted in over 24 inches of rain in Horry County. The Waccamaw River and tributaries caused significant flooding throughout northeastern South Carolina.
d. Nuclear Power Plants

The state has five nuclear power facilities and two closely located in neighboring states. All South Carolina counties, except for five coastal counties (Beaufort, Berkeley, Charleston, Dorchester, and Georgetown) fall within the 10 or 50 mile emergency planning zones of at least one nuclear power plant. More detailed information can be found in Attachment A, Annex 25 of this document and the South Carolina Operational Radiological Emergency Response Plan.

e. Earthquakes

(1) Earthquakes are common in South Carolina. Approximately 20 earthquakes (induced and tectonic) are recorded annually in South Carolina with 3 to 5 of them felt or noticed by people. About 70 percent of South Carolina earthquakes are located in the Middleton Place-Summerville Seismic Zone. Other locations in the State with low-level seismic activity in the last ten years include Bowman, Neeses, Aiken, McCormick, Greenwood, Liberty Hill, and the Savannah River Site. The two most significant historical earthquakes to occur in South Carolina were the 1886 Charleston/Summerville earthquake and the 1913 Union County earthquake. The 1886 earthquake in Charleston was the most damaging earthquake to ever occur in the eastern United States. In terms of lives lost, human suffering, and devastation, this was the most destructive United States earthquake in the 19th century.

(2) Earthquakes in South Carolina have the potential to cause great and sudden loss because devastation can occur in minutes. Forecasts indicate there is a 40 to 60 percent chance of a magnitude 6 earthquake somewhere in the central and eastern United States within the next 30 years. While there have not been any large scale earthquakes in South Carolina in recent years, a 2001 study confirmed the state is extremely vulnerable to earthquake activity. More detailed information can be found in Attachment C, Annex 25 of this document.
f. Fires

(1) In South Carolina, structural fires are divided into several categories: public assembly property, educational property, institutional, store/office, basic industry, utility defense, manufacturing, storage, special, residential, and unclassified. Each year South Carolina averages approximately 9,500 fires in all categories.

(2) Wildfires are caused by numerous sources ranging from lightning, arson, carelessness by smokers, individuals burning debris or operating equipment which throws sparks, to children playing with matches. However, the largest number of fires in South Carolina caused by people is woods arson and the second leading cause is careless debris burning.

(3) In a typical year, South Carolina responds to over 5,000 wildfires, which burn nearly 30,000 acres. South Carolina's wildfire season usually occurs between late winter and early spring. The largest wildfire occurred in April 1976 when 30,000 acres burned in Horry County. The state's worst 12-month period occurred between July 1980 and June 1981 when 14,405 fires were reported.

g. Hazardous Materials

The state's industrial capacity and the network of interstate highways and railways result in vulnerabilities to hazardous material releases from both stationary sites and transportation sources. In 2000, 1097 facilities reported storing extremely hazardous substances exceeding the Threshold Planning Quantity as classified by Section 313 of the Superfund Amendments and Reauthorization Act (SARA Title III). These facilities are located throughout the state in both rural and densely populated areas and do not include retail gas stations or telephone relay battery storage sites. Many facilities are located in coastal counties that could be impacted by hurricane force winds and rains. In 2000, approximately 500 facilities reported toxic chemical inventories of more than 10,000 pounds as classified by Section 313 of the Superfund Amendments and Reauthorization Act (SARA, Title III). Data indicates
these facilities are clustered along Interstate 85. While the greatest number of facilities concentrate along that route, numerous other toxic release inventory facilities, are located throughout the state adjacent to large population centers. Further, the extensive network of interstate highways and railways that supply industries with chemical and petroleum products could result in a moderate to large accidental release of hazardous materials from a transportation source.

h. Terrorism

(1) While there have not been any successful acts of terrorism committed in South Carolina in recent years, the state has many critical and high-profile facilities, high concentrations of population and other potentially-attractive venues for terrorist activity that are inherently vulnerable to a variety of terrorist methods. Recent nationwide terrorist activity and its continued threat continue to reinforce potential dangers.

(2) Governmental, transportation, commercial, infrastructure, cultural, academic, research, military, athletic and other activities and facilities constitute ideal targets for terrorist attacks which may cause catastrophic levels of property and environmental damage, injury, and loss of life.

(3) Terrorist attacks may take the form of other hazards described in this section when incidents of these types are executed for criminal purposes, such as induced dam or levee failures, the use of hazardous materials to injure or kill, or the use of biological weapons to create an epidemic.

(4) More detailed information concerning the State's response to a terrorist threat can be found in Attachment F, Annex 25 of this document.

i. Transportation

(1) South Carolina has a large transportation network consisting of major highways, airports, marine ports and passenger railroads. In many locations throughout the state, the potential exists that a major
transportation accident causing numerous injuries and/or fatalities may occur.

(2) With the linear configuration of several major highways in South Carolina, it is also important to note that a major transportation accident could occur in a relatively rural area, severely stressing the capabilities of local resources to respond effectively. Similarly, a major transportation accident could involve a large number of tourists and visitors from other countries, given South Carolina's popularity as a vacation destination, further complicating the emergency response to such an event.

j. Civil Disorder

Civil disorder may occur at anytime in South Carolina. However, civil disorder is often preceded by periods of increased tension caused by questionable social and/or political events such as controversial jury trials or law enforcement actions. More detailed information can be found in Attachment E, Annex 25 of this document.

k. Dam Failure

South Carolina has over 50,000 dams throughout the state, including 32 federally regulated dams and over 2,250 state regulated dams. At any time, one or more of these dams may be threatened by upstream flash floods, earthquakes, neglect or any combination of the above, which can cause personal injury or death, significant water damage to property or additional failures to dams located downstream. More detailed information can be found in Attachment D, Annex 25 of this document.

l. Severe Winter Weather

Snow and ice storms, coupled with cold temperatures, periodically threaten the state. Winter storms can damage property, create safety risks, destroy crops and valuable timber, damage infrastructure components such as power lines, and have enormous economic impacts. Snow and ice storms most recently struck South Carolina in 1989, 1993, 2000, and 2002.
m. Droughts

South Carolina is not immune to drought periods, the most recent having occurred in 1983, 1986, 1993, and 1998 - 2002. The 1998–2002 drought is one of the longest and most severe in more than 100 years. The 1998–2002 drought has had a major economic impact on the state with significant effects on tourism, forestry, and agriculture. Losses continue to accumulate and are difficult to quantify because of the indirect impact it has on so many sectors. The farm loses alone from this drought total over $1 billion.

3. A detailed hazard analysis by county can be found in the State of South Carolina Hazard Assessment, January 2001. A Hazard Rating Summary (Table 1), which is based on this assessment and provides a relative ranking of the hazards found in South Carolina, can be found on Page 41.

B. Assumptions

1. A disaster may occur with little or no warning, and may escalate far more rapidly than the ability of any single local response organization or jurisdiction to handle.

2. Most disasters/emergencies will be managed by local governments, utilizing resources within their jurisdictions.

3. When an emergency exceeds local resource and response capabilities, local government will request assistance from the next higher level of government.

4. When state property is affected, the responsible state agency will utilize its own resources and establish communications with the State Emergency Operations Centers (SEOC).

5. Both local government and state agencies will utilize resources obtained by pre-arranged agreements with neighboring jurisdictions, states and federal entities, and the local private sector prior to seeking the next higher level assistance.

6. The federal government will be available with financial and additional resources when response and recovery operations exceed the capabilities of state government in a Presidentially declared disaster or emergency. In some instances, federal
agencies may provide direct assistance without a Presidential declaration.

III. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

A. General

Most departments and agencies within the state government have emergency functions to perform in addition to their normal duties. See Table 2, Page 42, Organization for Emergency Operations. Each is responsible for developing and maintaining emergency management procedures in accordance with the direction and guidance given in this plan. Specific responsibilities are outlined in subparagraphs III.C through G, and in the separate annexes of this plan. Responsibilities of certain organizations that are not part of state government are also addressed in appropriate annexes.

B. Emergency Organization

Organizational responsibility assignments, primary (P) and support (S), covered by this plan are displayed in the matrix found in Table 3, Page 43. In the event it becomes necessary to request outside assistance, coordination will be made through the Director, South Carolina Emergency Management Division (SCEMD), and the Governor.

C. County

Regulation 58-1, Local Emergency Preparedness Standards, outlines county emergency management responsibilities. Key elements include:

1. Establishing a formal emergency management organization to be charged with duties incident to the protection of life and property in the county during an emergency, which includes:

   a. Developing a vulnerability analysis to identify hazards that may have a potential impact on the jurisdiction.

   b. Developing a county Basic Emergency Operations Plan outlining the roles and responsibilities of the County Emergency Management organization during an emergency, which will be updated annually and certified by SCEMD.

   c. Establishing and conducting an emergency preparedness exercise and training program.
d. Developing a system, based on available resources, to provide for timely warning of the public and the dissemination of instructions for self-protection during an emergency.

e. Establishing and conducting an ongoing emergency preparedness public education program.

2. Conducting emergency operations with support from within the jurisdiction and municipalities, and if needed the State, and effectively supporting the conduct of such operations.

D. State

1. Development of an emergency management organization at the state level involving all government agencies, private and volunteer organizations that have responsibilities in comprehensive emergency management within South Carolina.

2. Development and implementation of a broad-based public awareness, education and preparedness program designed to reach a majority of the citizens of South Carolina, including citizens needing special media formats, such as hearing impaired individuals.

3. Support of the emergency management needs of all counties by developing reciprocal intra- and inter-state mutual aid agreements, in addition to assistance from the Federal Emergency Management Agency (FEMA).

4. Direction and control of a state response and recovery organization based on functional support groups, involving broad participation from state, private and voluntary relief organizations, and compatible with the federal response and recovery organization and concept of operations.

5. Development and implementation of programs or initiatives designed to avoid, reduce and mitigate the effects of hazards through the development and enforcement of policies, standards and regulations.

E. Responsibilities of Heads of State Departments and Agencies

1. Appoint a department or agency emergency coordinator, and alternate, to support State Emergency Response Team (SERT) operations as assigned in this plan. Emergency coordinators will
2. Develop and maintain the internal SOPs for the execution of primary functions in accordance with this plan. Provide updated copies of detailed SOPs and manuals to the Director, SCEMD, within 15 days after date of completion.

3. Assign personnel to augment the SERT in the State Emergency Operations Center in accordance with requirements set forth by the Director, SCEMD.

4. Mobilize and utilize allocated and available resources to meet emergency or disaster requirements.

5. Maintain capability for the emergency procurement of supplies and equipment required and not otherwise available.

6. Provide training as appropriate to personnel assigned to execute respective emergency functions in this plan.

7. Maintain a 24-hour response team capability in department or agency.

8. Coordinate functional service provisions with local governments and private service organizations.

9. Assist federal representatives in providing emergency response or disaster assistance within the affected areas.

10. Conduct workshops and seminars as necessary to provide information regarding new equipment and operating procedures for all governmental, service organizations and volunteer personnel participating in the implementation of assigned function.

11. Provide all agency/department employees appropriate training to assure an awareness of the hazardous threats common to South Carolina and the overall state emergency management program.

12. Review this plan annually and update assigned annexes and SOPs to meet current department policy and organization. Revisions must be compatible with the policies set forth in the basic plan.
Two copies of the revised annexes shall be forwarded to the Director, SCEMD, when completed.

13. Maintain current internal notification/recall rosters and communications systems.

14. Assign appropriate personnel to succeed the "decision-making authority."

15. Participate in tests and exercises to evaluate this plan.

F. Responsibilities of the Director, SCEMD

1. Coordinate execution of the various annexes of this plan to the maximum extent with the emergency activities of local governments, state government, private agencies and organizations and the federal government.

2. Operate the State Emergency Operations Center (SEOC).

3. Maintain surveillance of potentially threatening conditions to and in South Carolina and direct appropriate warning and response actions.

4. Establish procedures for the maintenance and distribution of this plan on a current basis.

5. Encourage mutual aid agreements with federal agencies, other states, private industry and relief organizations and between local governments.

6. Provide technical and planning assistance to state agencies and local governments upon request.

7. Provide for periodic exercises to test and evaluate state and local plans to maintain a high standard of preparedness.

8. Establish an appropriate level of operational readiness.

9. Initiate any and all other actions deemed necessary for effective implementation of this plan.

10. Advise the Governor, state agencies, local government officials, and necessary federal agencies of severity and magnitude of the emergency/disaster situation.
11. Maintain a file of all Standard Operating Procedures (SOPs).

12. Maintain, update and distribute all changes to this plan, with annual review.

G. Federal

1. Provide emergency response on federally owned or controlled property, such as military installations and federal prisons.

2. Provide federal assistance as directed by the President of the United States under the coordination of FEMA and in accordance with federal emergency plans.

3. Provide direct federal assistance to Indian reservations.

4. Identify and coordinate provision of assistance under other federal statutory authorities.

5. Provide assistance to the state and local governments in response to and recovery from a commercial radiological incident consistent with guidelines as established in the current Federal Radiological Emergency Response Plan and the Federal Response Plan.

6. FEMA will coordinate the provision of non-radiological Federal resources and assistance to affected state and local governments.

H. Voluntary Organizations

1. Coordinate with government agencies to ensure a broad and comprehensive coverage of assistance and relief during emergencies.

2. Provide and coordinate relief not provided by government on a complementary and supplementary basis.

3. Develop mutual aid agreements and memoranda of understanding of duties and areas of responsibility to be performed during emergencies.

IV. CONCEPT OF OPERATIONS

A. General

This plan is based on three organizational levels of emergency management, namely, the local, state and federal governments.
Mitigation, preparedness, response and recovery are general responsibilities of all levels of government working together to provide a delivery system to meet the needs of the public. Emergency operations will be initiated at the lowest level able to respond to the situation effectively.

B. Local Governments

1. The governing body of each county shall operate, in accordance with Regulation 58-1, Local Emergency Preparedness Standards, their respective Emergency Operations Plans (EOPs) and Standard Operating Procedures (SOPs).

2. County governments shall be prepared to implement their EOPs when an emergency occurs or at the direction of the Director, South Carolina Emergency Management Division (SCEMD), or upon a declaration of a State of Emergency by the Governor.

3. County governments will use all municipal resources to protect against and respond to an emergency or threatening situation to include activating pre-established mutual aid agreements.

4. When municipal governments determine that municipal resources are not adequate, additional resources may be requested through the county emergency management agency or the county EOC.

5. When county governments determine that county resources are not adequate, they may request assistance through the SCEMD or, if activated, the SEOC.

6. County governments shall establish and maintain journals, records and reporting capabilities in accordance with state and federal laws and regulations.

C. State Government

1. State resources will supplement local efforts upon request or in accordance with the ESF annexes described herein.

2. The Governor or his designee may execute the SCEOP to support local situations when local resources are not adequate to sustain an effective response operation or when a significant State presence is required for immediate assistance.

3. When an emergency or disaster has occurred or is imminent, the Governor may issue an Executive Order proclaiming the existence
of a State of Emergency or activate the emergency response, recovery and mitigation aspects of state, local and inter-jurisdictional disaster plans. The Executive Order is required for the deployment and use of state personnel, supplies, equipment, materials and/or facilities. SCEMD will provide recommendations to the Governor and assist in formulating the Executive Order.

4. If disaster threatens prior to the ability of the Governor to issue an Executive Order proclaiming the existence of a State of Emergency, the Director, SCEMD is authorized to activate the plan and implement any emergency response actions that may be necessary for the immediate protection of life and property.

5. Emergency Support Functions (ESFs) will be established with State agencies and volunteer organizations to support response and recovery operations. A State agency within each ESF will have primary responsibility for the coordination and implementation of the ESF. By Executive Order, the designated primary agency will coordinate the development and preparation of Standard Operating Procedures (SOPs).

6. In the event of an emergency situation beyond local control, the Director, SCEMD, under the direction of the Governor, may assume direct operational control over all or any necessary part of the emergency operations functions within the state. To assure maximum response and efficient use of personnel and other resources, State Emergency Support Functions (ESFs) are designated as indicated:

Notes: State ESFs 1-12 match the Federal ESF structure. State ESFs 13, 14, 15, 16, and 17 are specific to South Carolina. Emergency Support Functions must be prepared to operate under a variety of conditions. Annexes 18, 19, 20, 21, 22, 23, and 24 are reserved for county or future use. Annex 25 describes the specific impact hazards affecting South Carolina.

7. Support agencies and volunteer organizations are incorporated in plan annexes. Additional state agencies may be required to support each state ESF.

8. Direction and control of a state emergency operation will be exercised by the Governor through the Director of the SCEMD, and the SEOC. The Director of the SCEMD will coordinate all state agencies and departments mobilized pursuant to this plan.

9. Under certain circumstances a forward command post may be established for on-scene direction, coordination, and control.

10. In order to make maximum use of advance warning, the State has established a system of Operating Condition (OPCON) levels. These OPCONS increase the State's level of readiness on a scale from 5 to 1. Each OPCON level is declared when a predetermined set of criteria has been met. OPCONS will not necessarily progress sequentially from 5 to 1. The OPCON placed in effect at any given time will be the appropriate one for existing conditions at the time. The SCEMD director will assign OPCON levels. OPCONS are designated by numbers as shown:
<table>
<thead>
<tr>

</tbody>
</table>

11. In the event of an emergency situation beyond county government control, the Director of the SCEMD, under the direction of the Governor, may assume direct operational control over all or any necessary part of the emergency operations functions within a jurisdiction.

12. The Director of the SCEMD may order a partial or full activation of the SEOC and request representation of state agency coordinators and volunteer organizations. Upon request, FEMA, Region IV will dispatch a representative to the SEOC to coordinate with the director of the SCEMD, and to provide assistance in accordance with the Federal Response Plan (FRP), as appropriate.

13. Upon declaration of a State of Emergency, public information briefings, news releases and all emergency information generated by State agencies and departments will be released through the SEOC.

14. For major/catastrophic events, ESF-15 (Military Support), in coordination with ESF-7 (Resource Support), may be tasked by the Director, SCEMD to establish, manage, and support a Logistical Staging Area (LSA). The LSA, normally located at or near a pre-determined airport in the impacted area, will receive, support and organize response resources for deployment.
15. State agencies and departments will establish supplementary agreements with their respective counterparts from other states to adapt interstate compacts, mutual aid, and statutes. SC is a signatory of the Emergency Management Assistance Compact (EMAC) that provides for mutual assistance (people, equipment, skills, etc) between participating member states in managing any emergency or disaster that is duly declared by the governor(s) of the affected state(s). The assisting state will receive approval from its governor before providing assistance. The requesting state will reimburse the assisting state for the cost of response. Normally an advance team (A-team) from the unaffected member state will deploy to the requesting state to assist in interstate coordination. Depending on the extent of the disaster, A-teams may also operate from the FEMA Regional Operations Center (ROC) and/or FEMA headquarters in conjunction with FEMA's Emergency Support Team (EST). Procedures for implementing the compact can be found in the Emergency Management Assistance Compact Guidebook and Standard Operating Procedures (2002), published by the National Emergency Management Association.

16. South Carolina is also a signatory to an Interstate Emergency Preparedness Compact between the states of South Carolina and Georgia, as well as an Interstate Emergency Preparedness Compact between the states of South Carolina and North Carolina.

17. Upon occurrence of an emergency or disaster clearly beyond the capabilities and resources of state and local governments, the Governor may request assistance from the federal government.

18. Initial planning for recovery will begin before an emergency event impacts South Carolina. While local governments are implementing response actions necessary to protect public health and safety, a team of recovery planners assigned to the SEOC will coordinate implementation of recovery programs.

19. State agencies and departments will support hazard specific and other supporting plans, such as the South Carolina Hurricane Plan, South Carolina Emergency Recovery Plan, and the South Carolina Operational Radiological Emergency Response Plan, as referenced in this plan.

D. Federal Government

1. Federal assistance will supplement state and local efforts and shall be provided under governing secretarial or statutory authorities.
2. To the extent that public law provides, any federal assistance made available to relieve the effects of an emergency or disaster in SC will be channeled through and coordinated by the Governor or his designated authorized representative.

3. Through the Federal Response Plan, the federal government provides assistance through twelve ESFs. These ESFs will establish direct liaison with South Carolina's ESF representatives in the SEOC. The five state-specific ESFs (13, 14, 15, 16, and 17) will establish liaison with members of the Federal Emergency Response Team (ERT) assigned federal coordination responsibility for that function.

4. If the disaster is of major or catastrophic classification, SC EMD will contact FEMA Region IV to request a FEMA Liaison or alert them that the Governor may submit a formal request for federal assistance.

5. If the President authorizes federal assistance, he appoints a Federal Coordinating Officer (FCO). The FCO is authorized to use the full authority of the Stafford Act and to reimburse response and recovery claims.

6. To help ensure state/federal coordination, FEMA Region IV's Regional Response Plan contains an Annex detailing South Carolina's emergency management system. This Annex outlines the SCEOP and unique operational activities the state implements when responding to disasters.

E. Disaster Field Office (DFO)

1. Following a major or catastrophic disaster that exceeds the State's ability to respond, in which an Emergency or Major Disaster Declaration is granted by the President, federal assistance to disaster victims may become available under three program areas: Individual Assistance, Public Assistance, and Hazard Mitigation. The administration of these programs is coordinated through a joint federal/state effort in a DFO.

2. The Recovery Manager is responsible for information flow and coordination of all state activities regarding Individual Assistance and Public Assistance.

3. The State Hazard Mitigation Officer is responsible for the Hazard Mitigation Grant Program and coordinates with the Department of
Natural Resources regarding National Flood Insurance Program activities.

F. Preparedness

1. SCEOP Development and Maintenance

   a. This plan is the principal source of documentation concerning the state's emergency management activities. Designated departments and agencies of state government have the responsibility for developing and maintaining a portion of this plan. Overall coordination of this process will be performed by the Director, SCEMD.

   b. The Director, SCEMD will coordinate the efforts of all responsible departments and agencies for plan development and timely update/revision. As a minimum, this plan will be reviewed and updated on an annual basis. Such reviews will be administered by SCEMD in cooperation with relevant federal, state, volunteer and private sector organizations. All organizations that have emergency-oriented missions or support roles are required to prepare supporting documentation (i.e. standard operating procedures).

   c. Following each emergency, SCEMD will conduct after action critiques to identify problems or areas requiring corrective actions. Steps will be taken to address any problem identified and to ensure current policy and procedures are implemented effectively.

2. Strategic Planning

   a. Five-Year Strategic Planning

      (1) SCEMD maintains a five-year strategic plan which identifies items SCEMD will focus on (e.g. mitigation, training, sheltering, recovery), and outlines activities to guide preparedness. SCEMD's five-year strategic plan is based on a self-assessment of capabilities and outlines objectives, strategies and measurable milestones to achieve desired enhancement. This plan also serves as the basis for the Emergency Management Performance Grant (EMPG) with FEMA.
(2) Each South Carolina county also maintains a five-year strategic plan that is based on a local self-assessment of capability. The strategic planning process guides both state and county preparedness and enhances South Carolina's ability to implement all four phases of emergency management.

b. Hazard Mitigation Strategic Planning

(1) SCEMD maintains a hazard mitigation plan (The South Carolina Hazard Mitigation Plan, revised annually) which establishes a comprehensive program to effectively and efficiently mobilize and coordinate the state's services and resources to make South Carolina's communities more resistant to the human and economic impacts of disasters.

(2) The South Carolina Hazard Mitigation Plan serves as SCEMD's operational and programmatic guidance to promote the nationally-based goals and objectives of the "National Mitigation Strategy," as coordinated by the Federal Emergency Management Agency. Development and implementation of local mitigation strategies are encouraged under the South Carolina Hazard Mitigation Plan.

3. Training and Exercise

a. For South Carolina's emergency management program to be successful, an effective and comprehensive training and exercise program is essential. SCEMD has designed a program to enhance the training of state, local, and volunteer personnel on their roles and responsibilities in the four phases of emergency management (preparedness, response, recovery, and mitigation).

b. The program ensures the operational readiness of the State Emergency Response Team (SERT) and local governmental responders through the design and delivery of courses, professional development seminars and workshops, and hazard specific exercises (e.g., annual State Exercise, Radiological Emergency Preparedness Exercises for commercial nuclear power plants, etc.) to test established plans and procedures that are activated during an emergency situation at all levels of the emergency management system.
4. The SEOC will be maintained in operational readiness by SCEMD and the state will maintain an emergency communications vehicle (ECV) to serve as a mobile communications post under the operational control of SCEMD for on-scene direction, coordination, and control.

G. Response

1. County/Municipal Response

Municipal units of government call upon their county government or other municipalities in coordination with their county for assistance during events in which their own capabilities are overwhelmed. Counties provide assistance to municipalities and turn to mutual aid or the state for assistance when their capabilities are overwhelmed.

2. Local State of Emergency

As county operations progress, the county may declare a local state of emergency implementing local emergency authorities.

3. County Emergency Operation Center

The County EOC serves as the central clearinghouse for information collection and coordination of response and recovery resources within the county, including the municipalities within the county. During a major or catastrophic emergency in South Carolina, counties not impacted may also be requested to activate their EOCs. This action allows the SEOC to coordinate the delivery of intra-state mutual aid in an organized manner through the county network.

4. State Response

The state must be prepared to respond quickly and effectively on a 24-hour basis to developing events. When an event or potential event is first detected, the SEOC is activated to a level appropriate to the magnitude of the threat. The state's response effort is managed through the State Emergency Response Team (SERT), which is organized into 17 Emergency Support Functions (ESF). Primary and support organizations are designated for each of these ESFs.

5. State Emergency Operations Center (SEOC)
a. The SEOC serves as the central clearinghouse for disaster-related information, and requests for deployment of assistance. As the situation dictates, an alternate SEOC may be activated.

b. The SEOC will be activated and staffed in accordance with the SEOC SOP. Upon notification that the SEOC is being activated, members of the SERT will report to the SEOC. The primary agency designated for a particular ESF has the responsibility to ensure supporting agencies are informed and their actions coordinated. In the absence of the Director, SCEMD, decisions will be made by the Chief of Operations.

c. The SEOC will be organized into the following groups:

   (1) Executive Group: Comprised of the Governor; Director, SCEMD; constitutional officers; and cabinet/department directors as directed by the Governor. Additional officials may be added as required. Responsibilities include:

      (a) Establishes priorities and allocates resources to support disaster tasks and operations.

      (b) Develops the overall plan of action, including deployment of personnel and equipment to implement this plan.

      (c) Directs state support and recovery operations in the disaster area and provides emergency funding of state operations.

      (d) Coordinates requests for and utilization of federal support.

   (2) Operations Group: Comprised of the Chief of Operations, operations staff, and ESFs. Responsibilities include:

      (a) Executes the overall plan providing direction and control for the SEOC, assigns tasks to ESFs and coordinates activities throughout the operational area.
(b) Collects and analyzes damage data.

(c) Collects, analyzes, displays, and disseminates emergency operational information.

(d) Determines priorities for deployment of the State Assessment Team (SAT).

(e) Activates the State Emergency Response Team (SERT).

(f) Assesses requests for state and federal support.

(g) Prepares requests for and coordinates preparation and submission of data for a Presidential Disaster Declaration.

(h) Prepares to move to an alternate EOC, if necessary.

(3) Administrative/Logistics Group: Comprised of the SEOC facility manager, communications officer, information resource officer, and staff. Responsibilities include:

(a) Provides administrative and logistical support to the emergency operations center staff.

(b) Provides effective communications to support SEOC operations.

(c) Provides automation systems support within the SEOC.

(4) Public Information Group: Comprised of the SCEMD PIO and State agency augmentees. Responsibilities include:

(a) Advises the Executive and Operations Group on matters of emergency public information.
(b) Collects, prepares, and disseminates emergency information to media outlets.

d. Activation levels utilized by the SEOC are:

(1) Full - All ESFs will be activated. Activation will occur at OPCON 1 and 2 and may occur at OPCON 3.

(2) Limited - Selected ESFs will be activated. Activation will normally occur at OPCON 3.

(3) Partial - Only selected SCEMD personnel will be activated. Activation will normally occur at OPCON 3, but could occur at OPCON 4.

6. State Liaison Officer/Team

A State Liaison, typically a SCEMD Area Coordinator, may be dispatched to the county(ies) threatened by or experiencing an emergency or disaster. The State Liaison is responsible for providing an on-going assessment of the situation, technical assistance, and relaying local recommendations or resource requests to the SEOC.

7. State Assessment Team (SAT)

a. It is imperative that disaster impact assessments be made quickly to determine the necessary state response or federal assistance following any major or catastrophic disaster. To accomplish this, one or more State Assessment Teams may be deployed to evaluate immediate needs and report the findings to the SEOC.

b. SAT teams, typically consisting of 10-12 state personnel, will evaluate immediate victim needs (food, water, medical, shelter, etc) and impact to infrastructure (utilities, communications, transportation, etc). The South Carolina Emergency Management Division, SC National Guard, Department of Transportation, Budget and Control Board (General Services Division and Office of State Chief Information Officer), Department of Health and Environmental Control, Department of Social Services, Public Service Commission, Department of Natural Resources, and the State Law Enforcement Division provide team members. An initial report will be
transmitted to the SEOC as soon as practical after arrival of the team followed up by a detailed report within 6-8 hours. Detailed procedures are outlined in the State Assessment Team Standard Operating Procedures.

8. Logistical Staging Areas (LSAs)

Logistical Staging Areas - For emergencies requiring major mobilization of supplies, materials, equipment and personnel prior to, during, and after the emergency, a Logistical Staging Area (LSA) may be established near the impacted area. This LSA will receive, classify, and account for emergency relief and sustainment supplies and goods, solicited by the state and, upon request, make distribution to county distribution sites within the disaster area.

H. Recovery

1. Recovery operations in South Carolina will be executed in accordance with the South Carolina Emergency Recovery Plan. The Recovery Plan is designed to supplement the SCEOP and identifies a range of specific actions to be taken by State agencies to support local governments and to coordinate emergency recovery activities.

2. Recovery activities are those actions that enable disaster victims to begin the process of rebuilding their homes; replacing property; resuming employment; restoring businesses; permanently repairing, rebuilding, or relocating public infrastructure; and mitigating future disaster losses.

3. Initial planning for recovery operations begins before the disaster occurs. The SEOC will have been staffed according to SEOC procedures and necessary actions to protect the public will have been implemented. Initial recovery activities will begin after the disaster assessment has been completed.

4. When conditions allow, rapid and thorough assessments must be conducted to identify the immediate unmet emergency needs of disaster victims; to assess the overall damage to homes and to businesses; to assess the overall damage to critical public facilities and services; and to determine whether those damages are sufficient to warrant supplemental Federal disaster assistance.

5. The decision to deploy State damage assessment teams will be made in coordination with the affected county governments. Damage assessment teams will be organized and trained in
advance. Preparations will be made to deploy teams into affected areas as quickly as possible. These teams include State Assessment Teams, Initial Damage Assessment Teams, and Preliminary Damage Assessment Teams.

6. Depending on the results of the damage assessment, the Governor may request a Presidential Disaster Declaration, which will make the State eligible for a variety of federal assistance programs. To assist in coordinating these programs, the Governor will appoint a State Coordinating Officer (SCO), a Governor's Authorized Representative (GAR), and a State Hazard Mitigation Officer (SHMO).

7. Upon activation of a Disaster Field Office (DFO), SEOC operations may be terminated and state operations integrated into the DFO.

I. Mitigation

1. Following a Presidential Disaster Declaration, the SHMO will execute the mitigation plan and implement the Hazard Mitigation Grant Program (HMGP) according to the procedures outlined in the Hazard Mitigation Grant Program Administrative Plan.

2. The SHMO will review and revise the Hazard Mitigation Grant Program Administrative Plan as necessary.

3. The SHMO will review and revise the State Hazard Mitigation Plan as necessary.

4. The SCEMD Chief of Recovery and Mitigation and the SHMO will develop the State's Management Cost Plan.

5. The SHMO will work with the Public Assistance Program to ensure that all Stafford Act Section 406 mitigation opportunities are identified. Section 406 provides for direct federal assistance for repairs and improvements to eligible damaged public facilities.

6. The SHMO will work with FEMA and appropriate state agencies to develop a disaster specific mitigation Implementation Strategy. The Implementation Strategy will include an overview of the disaster, geographical and mitigation measure priorities, and a Disaster Field Office Action Plan.
V. WARNING

A. Warning includes information and reports; surveillance of threatening conditions; 24-hour radio, special telephone (NAWAS) capability; and operations of the Emergency Alert System (EAS). State assistance under this function consists of the utilization of equipment and personnel essential to coordinate and disseminate information before and during an impending or actual disaster situation. The State Warning Point is located at the South Carolina Emergency Management Division. This location serves as primary Warning Point for all incidents. The Department of Public Safety Telecommunications Center, Broad River Rd, Columbia, SC, serves as the Alternate Warning Point for fixed nuclear facility incidents and the State Law Enforcement Division (SLED) for the NAWAS.

B. The South Carolina Emergency Management Division (SCEMD) will coordinate with all appropriate departments/agencies and organizations to ensure warning readiness in time of a man-made or natural disaster or emergency.

C. In the event of an imminent or actual disaster, SCEMD will initiate actions to warn local governments and other state agencies, by all means necessary.

D. A variety of warning systems are available for use during emergency operations. Weather advisories will be made throughout state and local communications networks as appropriate to alert local governments to conditions. These advisories will be received from the National Weather Service (NWS) using the National Warning System (NAWAS) and other electronic means. The Emergency Notification Network (ENN) is available for use during nuclear power plant emergencies. Emergency information may also be received and transmitted using the SLED National Crime Information System (NCIS) teletype terminal. The Emergency Alert System (EAS) will be used to notify the general public of emergency conditions. The State Warning Point maintains a capability to use numerous radio systems and networks to provide a statewide emergency warning system including the SCEMD Local Government Radio (LGR) network, the 800 MHz state radio system, satellite connections, high frequency radio, and amateur radio.

E. The South Carolina Emergency Management Division (SCEMD) will maintain surveillance of storms using NWS Weather Wire Service and information resource programs such as Hurrevac, Inland Winds, and other related software. NWS weather information including the Emergency Managers Weather Information Network (EMWIN) is also available through both internet and direct satellite feed. This information will be
communicated to local governments and state agencies and will be used for the latest updates. Local governments are also encouraged to use these automation tools.

F. Notification to other Emergency Operations Centers (EOCs), (Federal Emergency Management Agency (FEMA) Region IV, other states, major cities and county emergency management organizations) shall be initiated whenever the potential for an emergency exists.

G. Local governments shall prepare plans and procedures for employment of local warning procedures utilizing all available systems and networks. Personnel and facilities shall be organized and exercised to provide warning capability on a 24-hour-a-day basis.

H. Agreements and contracts shall be made to ensure equipment and system maintenance on a 24-hour-a-day basis. Alternate warning systems shall be maintained and tested for use in the event that the existing primary system is damaged and rendered inoperable.

VI. EVACUATION

A. Evacuation is the controlled movement and relocation of persons and property necessitated by the threat of a natural, technological, or man-made disaster. The evacuation of large numbers of people from vulnerable areas will stress the limited capabilities of the state's road network. Therefore, a major evacuation of personnel must be initiated as soon as feasible with direction and control and coordination with all appropriate departments/agencies conducted through the State Emergency Operations Center (SEOC).

B. SCEMD will monitor conditions that have the potential to require the evacuation of any area(s) of the state and implement changes in Operating Conditions (OPCONs) as necessary. SCEMD will coordinate with affected counties, appropriate state agencies, federal agencies, other states, and appropriate private sector sources in developing an evacuation recommendation for the governor. SCEMD will notify the Governor and make recommendations as required.

C. SCEMD will coordinate for evacuation routing to shelters, provision of transportation, shelter and congregate care, and provide public information to deal effectively with the situation through the Public Information Phone System (PIPS).

D. The Department of Public Safety, Highway Patrol, is the Governor's executive agent for all traffic control issues before, during, and after an evacuation operation. Evacuation operations will be conducted under the

SCEOP

January 2003
auspices of ESF-16 (Emergency Traffic Management) as delineated in Annex 16 of this plan.

E. Emergency conditions and affected areas that may require evacuation include:

1. Hurricanes: Coastal areas, beachfront properties, low-lying areas around streams, and mobile home areas.

2. Nuclear Power Plants: Areas inside the 10-mile emergency planning zone (EPZ) surrounding nuclear power plants.

3. Hazardous Materials Incidents: Densely populated areas throughout the state.

4. Dam Failures and Floods: Inundation areas below dams and low-lying areas around rivers, streams, and swamps.

5. Earthquakes: Densely populated areas throughout the state.

6. Weapons of Mass Destruction Incidents: Densely populated areas throughout the state.

F. Depending on circumstances, one of three types of evacuation may be employed:

1. Voluntary Evacuation. In the event a threat is posed to population centers, local officials or the Governor may recommend that those citizens who feel threatened leave the vulnerable area. This evacuation normally, but not always, occurs prior to a mandatory evacuation order being issued. Selected shelters will be opened.

2. Mandatory Evacuation. Under the terms of Section 25-1-440, SC Code of Laws, the Governor is the only person authorized to mandate and compel evacuation in South Carolina. During a mandatory evacuation all citizens are expected to leave the affected area. Under a mandatory evacuation order, nursing homes and residential care facilities are required to evacuate. However, hospital administrators are given the discretion to assess the situation and make a determination with regard to what is in the best interest of their patients. They may decide to shelter patients in place.

3. Protective Relocation. This form of evacuation is normally associated with hurricanes. Inland counties are not vulnerable to storm surge; however, they are at risk to the high winds associated
with hurricanes. In order to protect this population, it might be necessary to relocate those living in vulnerable structures to facilities more resistant to high winds. The decision to issue a protective relocation order is the responsibility of each inland county.

G. Information is essential to a successful evacuation. In order to effectively manage a major evacuation every involved organization must have timely and accurate information regarding the current characteristics of the evacuation, support operations, resource availability, and the hazard itself. To accomplish this, a process for routine communications and coordination will be initiated by the SEOC and all involved county EOCs upon determining that a major evacuation must be executed. Examples of such information regarding evacuations include:

1. Characteristics of the hazard and associated events.
2. Designated evacuation area, initiation times, and resource mobilization status.
4. Progress of resource pre-deployment.
5. Status of available public shelter.
6. Estimated time to complete evacuation.

H. After the threat that caused the evacuation has passed, the Director, SCEMD, in coordination with appropriate state and county agencies will assess the situation and make a recommendation to the Governor with regard to rescission of the evacuation order. Upon rescission of the evacuation order, community officials will control the timing for re-entry/return of citizens as the situation and public safety considerations allow. DPS will develop and execute a return traffic management plan.

I. Post evacuation activities will also include a review and critique of the regional evacuation and associated procedures to determine the need to modify the plan.

VII. PUBLIC INFORMATION

A. Providing emergency information to the public from all levels of government is essential to avoid or minimize loss of life and property if a disaster is imminent or has occurred. Before, during, and after emergency
operations, the public will be apprized through reports to the news media and Emergency Alert System.

B. The information provided before, during, and after a disaster/emergency shall provide clear, concise, and accurate information on the existing situation in the disaster area, actions being taken by the authorities, and those to be taken by the population. Every effort shall be made to prevent and counter rumors, hearsay, and inaccurate information.

C. Coordination with all appropriate departments, agencies, and organizations will be performed to ensure proper emergency public information coverage.

D. Standard Operating Procedures will be developed and maintained by the Public Information Officer, South Carolina Emergency Management Division (SCEMD).

E. On behalf of the Governor, the Director, SCEMD, through the SCEMD Public Information Officer or designee, is responsible for informing the public of emergency and disaster operations within the state. The dissemination of public information during emergency and disaster operations is done with the advice and consent of the Governor's Press Secretary, who reserves the authority to intervene, to assume control, or to disseminate supplementary public information at any time.

F. Assistance will be provided by public information personnel of any state agency or department if requested. The SCEMD Public Information Officer will keep the Governor's Press Secretary informed of media-related events as they unfold and will provide such information on a continuing and timely basis.

G. Public information procedures will be prescribed by the Public Information Officer, and all actions will be conducted upon approval and full knowledge of the Director, SCEMD, and with the advice and consent of the Governor's Press Secretary.

H. The Public Information Officer will identify qualified personnel from other state agencies for use as media liaisons either at the scene of the emergency or at the State Emergency Operations Center (SEOC), or at the Public Information Phone System (PIPS) location. Heads of all departments and agencies shall provide public information personnel and equipment resources when requested. Agencies shall be prepared to transport support personnel and equipment whenever and wherever an emergency or disaster occurs in South Carolina, regardless of the time.
The South Carolina EAS shall be utilized through the joint cooperation of the Federal Communications Commission, the Federal Emergency Management Agency (FEMA), SCEMD, the National Weather Service (NWS), the South Carolina broadcast industry, and local government officials in South Carolina's EAS operational areas. The South Carolina EAS will be considered part of the National EAS and will be activated appropriately according to established area, state, and national EAS procedures.

A coordinated effort to report and document emergency/disaster operations will be conducted at the SEOC and at the scene of operations.

Situation briefings, press conferences, taped messages, photographs, news accounts, statistics on injuries and fatalities, and other information shall be provided to the news media as appropriate.

The state will provide similar materials and briefings for state and federal officials and coordinate state and local information/news releases with related federal, state, and local agencies and officials. The SCEMD Public Information Officer will coordinate with the Governor's Press Secretary regarding such activities.

The SCEMD Public Information Officer will consult with appropriate department or agency heads concerning implementation of emergency or disaster public information activities. Timely and continuing information to the Governor's Press Secretary will be provided and appropriate recommendations made if requested.

VIII. ADMINISTRATION AND LOGISTICS

A. General

A large-scale emergency or disaster will place great demands on resources of the state. Distribution of required resources may be made difficult by such emergencies. Initially, priority for distribution of supplies will be given to food, water and medication. Resources will be identified and provided as soon as a need has been established. Coordination with appropriate departments and agencies will be performed to ensure that operational readiness is maintained at all times. Administrative procedures will be conducted in accordance with existing rules and regulations.

B. Funding and Accounting

1. State
Expenditures of State funds for emergency operations will be conducted in accordance with SC law. Utilizing emergency powers, the Governor may mobilize all available resources of the state government as necessary to cope with the emergency. Accounting for expenditure of state funds will be conducted under state laws and regulations and is subject to audit by the State Auditor. State agencies/departments and local governments are responsible for the collection, reporting and maintenance of records of obligation and expenditures incurred during a response to an emergency or disaster situation. These records shall serve as a database in assessing the need and preparation of requests for federal assistance.

2. Federal

Federal funds made available to the state pursuant to an emergency or disaster program will, to the extent provided by law, be channeled through the Governor or his designated representative. Use of federal funds is subject to audit and verification by state and federal auditors. Local governments and heads of state agencies and departments will establish systems to report on and account for any public funds used for emergency or disaster purposes.

C. Consumer Protection

The Department of Consumer Affairs will monitor emergency activities to provide protection to consumers. Complaints may be initiated by calling the Consumer Affairs Department, at their statewide toll free number, 1-800-922-1594.

D. Protection of the Environment

All actions taken pursuant to repair and restoration by a government agency, individual, or private entity will comply with South Carolina and federal laws, rules and regulations regarding the environment. Additional information on requirements may be obtained from the South Carolina Department of Health and Environmental Control.

E. Nondiscrimination

Discrimination against persons on the basis of age, color, economic status, nationality, race, religion, sex or handicap in the administration of emergency services or disaster relief is prohibited. Complaints of discrimination in emergency operations or disaster relief will be made to the local emergency management organizations for investigation and further action.
F. Duplication of Benefits

Federal law prohibits any persons, business concerns, or other entities from receiving federal disaster assistance when compensation for the loss has been received from an insurance company or any other source.

IX. CONTINUITY OF GOVERNMENT

Continuity of Government (COG) is an essential function of emergency management and is vital during an emergency/disaster situation. All levels of government (federal, state, and local) share a constitutional responsibility to preserve the life and property of their citizens. State and local continuity of government is defined as the preservation, maintenance, or reconstitution of the civil government's ability to carry out its constitutional responsibilities.

A. Succession of Authority

1. Executive Branch: In South Carolina, the succession of authority begins with the Governor, the “supreme executive power” of the state. In the event the Governor, for reasons specified by the state constitution, cannot perform the duties of his office, in accordance with Section 1-9-30, Code of Laws of South Carolina, 1976, the line of succession will transfer from the Governor to the Lieutenant Governor, then to the President Pro Tempore of the Senate, then to the Speaker of the House of Representatives, then to the Secretary of State, then to the State Treasurer, and then finally to the Attorney General.

2. Legislative Branch: Each member of the General Assembly, in accordance with Section 2-5-30, Code of Laws of South Carolina, 1976, will designate not fewer than three, nor more than seven, emergency interim successors to administer his/her powers and duties.

3. Judicial Branch (Section 1-9-70, SC Code of Laws)

   a. The Supreme Court: The Governor shall designate for each member of the supreme court special emergency judges in the number of not less than three, nor more than seven and shall specify the order of their succession.

   b. Court of Records: The Chief Justice of the Supreme Court, in consultation with the other members, shall designate for each court of record except the Supreme Court, special emergency judges in the number of not less than three nor
more than seven for each judge of the courts, and shall specify the order of their succession.

c. Circuit Court: The Judge of the circuit court shall designate not less than three special emergency judges for courts not of record within that circuit and shall specify their order of succession.

4. All state executive officers, either appointed or elected, shall designate three to seven emergency successors for themselves (Section 1-9-40, SC Code of Laws).

5. The line of succession for state government and primary emergency support service agencies can be found in Table 4, Page 47.

B. Delegations of Emergency Authority

C. Emergency Actions

1. The South Carolina Emergency Operations Plan assigns primary and support state agency responsibility to the various Emergency Support Functions (ESFs) and other support activities. Specific emergency delegations are contained in this plan. The head of each executive department and other state commissions and departments will designate an individual as the emergency point of contact for that ESF.

2. Immediate emergency action response to ensure continuity of government direction and control, human services, economic affairs, communications, energy, transportation, and law and public safety may require the following:

   a. Relocation of the seat of government from current location;

   b. Replacing primary officials with alternates if they are unable to fulfill their responsibilities;

   c. Relocation of vital records to sites less vulnerable to ensure greater safety and survival.
D. Preservation of Records

1. In order to provide normal government operations following an emergency or disaster, essential records (i.e., vital statistics, deeds, corporation papers, operational plans, resource data, authorities, personnel and payroll rosters, succession lists, supplies and equipment lists, laws, charters and financial records) must be protected, by each department or agency.

2. Heads of each agency/department are encouraged to inventory and prioritize vital records in his/her custody. Each agency retains copies to work with day to day while the master copy is preserved in a central storage facility. Each agency/department should arrange safekeeping for those records it deems important, but which were not selected for the priority protection.

3. Agency personnel must have access to and be able to use these records and systems in conducting their essential functions. Plans should account for the identification and protection of vital records, systems, and data management software and equipment, to include classified or sensitive data as applicable, necessary to perform essential functions and activities, and to reconstitute normal agency operations after the emergency. To the extent possible, agencies should regularly update duplicate records or back-up electronic files.

E. Protection of Government Resources

1. Essential functions are those that enable State agencies to provide vital services, exercise civil authority, maintain the safety and well being of the general populace, and sustain the industrial/economic base in emergencies. The success of agency operations at an alternate facility is absolutely dependent upon the availability and redundancy of critical communications systems to support connectivity to internal organizations, other agencies, critical customers, and the public. When identifying communications requirements, agencies should take maximum advantage of the entire spectrum of communications media likely to be available in any emergency situation. These services may include, but are not limited to: secure and/or non-secure voice, fax, and data connectivity; Internet access; and e-mail.

2. The Division of the State Chief Information Officer, SC State Budget and Control Board, has promulgated security rules for data
processing records and systems, which include emergency preparedness requirements.

F. Emergency Operations Center

1. Primary State Emergency Operations Center (SEOC): The State Emergency Operations Center (SEOC) is the facility from which state response to emergencies is directed and controlled. It is the designated headquarters for the Governor when he is directing state response to disasters. The SEOC is staffed by representatives of state agencies and other personnel as required. The coordination of a state response, as well as a federal response, will come from the SEOC, under the direction of the Governor.

2. Alternate State Emergency Operations Center: All agencies shall prepare for the possibility of unannounced relocation of essential functions and/or continuity of government contingency staffs to alternate facilities. Facilities shall be capable of supporting operations in a threat-free environment, as determined by the geographical location of the facility, a favorable assessment of the local threat, and/or the collective protection characteristics of the facility.

</table>

**Frequency**

- **Highly Likely**: Near 100% probability in the following year.
- **Likely**: Between 10 and 100% probability in the next year or 1 chance in the next 10 years.
- **Possible**: Between 1 and 10% probability in the next year or at least 1 chance in the next 100 years.
- **Unlikely**: Less than 1% probability in the next 100 years.

**Severity**

- **Catastrophic**: Multiple deaths, complete shutdown of critical facilities for over 30 days, more than 50% property damage.
- **Critical**: Permanent disabilities, shutdown of critical facilities for two weeks, more than 25% property damage.
- **Limited**: No permanent disabilities, shutdown of critical facilities for one week, more than 10% property damage.
- **Negligible**: Injuries treatable with first aid, minor quality of life lost, shutdown of critical facilities for 24 hours or less, less than 10% property damage.
# TABLE 2
## ORGANIZATION FOR EMERGENCY OPERATIONS

![Organizational chart for emergency operations]

### Governor
- Constitutional Officers
- Emergency Management Division
- ESF 1: Transportation
  - Dept. of Transportation
- ESF 2: Communications
  - Budget and Control Board
- ESF 3: Public Works and Engineering
  - Dept. of Transportation
- ESF 4: Firefighting
  - Dept. of Labor, Licensing and Regulation
- ESF 5: Information and Planning
  - Emergency Management Division
- ESF 6: Mass Care
  - Dept. of Social Services
- ESF 7: Resource Support
  - Budget and Control Board
- ESF 8: Health and Medical Services
  - Dept. of Health and Environmental Control
- ESF 9: Search and Rescue
  - Dept. of Labor, Licensing, and Regulation
- ESF 10: Hazardous Materials
  - Dept. of Health and Environmental Control
- ESF 11: Food
  - Dept. of Social Services
- ESF 12: Energy
  - Public Service Commission
- ESF 13: Donated Goods and Volunteer Services
  - State Law Enforcement Division
- ESF 14: Military Support
  - Budget and Control Board
- ESF 15: Law Enforcement
  - National Guard
- ESF 16: Emergency Traffic Management
  - Dept. of Public Safety
- ESF 17: Animal Emergency Response
  - Clemson Univ. Livestock/Poultry Health

### Direction
- Office of the Governor
- Dept. of Education
- Dept. of Natural Resources
- Dept. of Agriculture
- Dept. of Commerce
- Dept. of Revenue
- Dept. of Parks, Recreation, and Tourism
- Alcohol and Other Drug Abuse Services
- Dept. of Mental Health
- Dept. of Insurance
- Dept. of Corrections
- Dept. of Probation, Parole, and Pardon Services

### Coordination
- Clemson Extension and Regulatory and Public Service
- Dept. of Disabilities and Special Needs
- Public Service Authority
- SC Ports Authority
- Dept. of Vocational Rehabilitation
- State Board for Tech. and Comp. Education
- Educational TV Network
- SC Food Bank Association
- Civil Air Patrol
- State Guard
- American Red Cross
- The Salvation Army
- Adventist Community Services
- Office of the State Archeologist
- SC Coroners and Funeral Directors Associations
- SC Pharmacy Association
- SC Health and Medical Associations
- Animal Care and Veterinarians Associations

TABLE 4

SUCCESSION OF AUTHORITY AND PREDELEGATION

Continuity of government and direction of emergency functions are essential during emergency operations. The following lines of succession are specified to ensure availability of a service coordinator/head of state offices. Permanent replacements shall be made as required or authorized by law.

Decision making authority for the executive branch and each state office with primary emergency support function responsibilities is listed in decreasing order. The predelegated authorities will assume command when the primary decision maker is deceased, incapacitated or absent at time of emergency.
