STANDARDS AND DESIGN CRITERIA FOR EXHIBITS AND SIGNS

E2.1. THE PENTAGON CORRIDOR COMMITTEE (PCC)

The PCC will establish and maintain standards and criteria for exhibits and signs in the renovated Pentagon and on the Pentagon Reservation. Standards and criteria that the PCC maintains shall cover the exhibit's purpose, size, proposed location, design standards, applicable legal requirements, and building code and security requirements. The PCC standards and criteria shall at a minimum include the standards and criteria listed in section E2.2. The PCC may waive the application of a standard or criteria, including those listed in section E2.2., on a case-by-case basis as it determines appropriate.

E2.2. STANDARDS AND CRITERIA

E2.2.1. Exhibits

E2.2.1.1. Exhibits may be either temporary or permanent. Examples of permanent exhibits are the Bradley Corridor, Eisenhower Corridor, the McArthur Corridor and the Hall of Heroes. Examples of temporary exhibits are the Combined Federal Campaign exhibit, Special Emphasis exhibits, Drug Awareness events, Conservation Week exhibits, and Crime Prevention Awareness exhibits.

E2.2.1.2. Exhibits will be housed in public space only if they are of general interest to the public and the entire DoD community. Exhibits that are of interest only to the sponsoring or requesting Agency, or that glorify a particular Agency only, will be housed in Agency space, and not in public space.

E2.2.1.3. Exhibits will comply with all access requirements, mandated by reference (a) of this Instruction, such as accommodations for the physically and visually impaired, safety requirements, State and county and building codes and security requirements established by the Defense Protective Service.

E2.2.1.4. Exhibit design review for proposed exhibits consists of an evaluation of the exhibit's craftsmanship, materials, content, and overall appearance in order to ensure it meets the requirements of this Instruction.
E2.2.1.5. Exhibit design requirements will vary for different areas of the renovated Pentagon. For example, certain areas on the Concourse may have height restrictions (say, four feet), whereas that same exhibit may have a different restriction elsewhere (say, eight feet high outside the cafeterias).

E2.2.1.6. During the initial fit-out for Agency space, Agencies will select the cabinets for their exhibits from the standard menu of casework styles available from the Pentagon Renovation Program Office’s established contracts for exhibit casework. Agencies are responsible for providing funds for exhibit cabinets. Art work or other decoration intended for direct application to walls, columns, and other building surfaces is not authorized.

E2.2.2. Signs

E2.2.2.1. The system of signs for the renovated Pentagon consists of modular aluminum panels that fit onto a fixed backing panel with an integral framework and are locked into place with removable end caps. The Pentagon Renovation Program Office maintains a list of vendors from which the approved signs may be procured. The wording on signs consists of vinyl lettering, which is applied to aluminum panels. Agency signs may be updated using the following methods:

E2.2.2.1.1. In-house graphics support facilities.

E2.2.2.1.2. Procurement of signs from Agency contractors who are capable of maintaining strict adherence to the standards of this enclosure.

E2.2.2.1.3. Term contracts established by PBMO to procure signs.

E2.2.2.1.4. Reimbursement shall be accomplished in accordance with DoD Instruction 5030.6 (Reimbursable Work Authorization Procedures for WHS Operated Facilities).

E2.2.2.2. Signs for room numbers will adhere to the standard nomenclature for fire, safety and security purposes. Signs for room numbers will also be placed at a height of five feet from the floor on the non-hinge side of the door. Signs will conform to the following additional standards:
E2.2.2.2.1. As outlined in reference (a) of this Instruction, conform to the:

E2.2.2.2.1.1. Recommended stroke width and height for numbers and letters;

E2.2.2.2.1.2. Typeface with raised pictograms and Braille characters;

and

E2.2.2.2.1.3. Standard mounting height for tactile signs.

E2.2.2.2.2. Color standards are as follows:

E2.2.2.2.2.1. **Type:** Dark brown (to match "deep bronze" finish).

E2.2.2.2.2.2. **Accent Bar:** Deep bronze color (matches door hardware with light beige letters and numbers.)

E2.2.2.2.2.3. **Raised Letters or Pictograms Signs:** Dark brown type or symbol on light beige background.

E2.2.2.2.2.4. **Overhead Signs:** Light beige letters or numerals on deep bronze background.

E2.2.2.2.3. Typography standards are as follows:

E2.2.2.2.3.1. Standard typeface for interior signs is Helvetica Medium, with other weights or configurations of the Helvetica typeface family used sparingly for emphasis, differentiation, etc.

E2.2.2.2.3.2. Type should be aligned flush left with a ragged right layout. Room numbers will be centered.

E2.2.2.2.3.3. Line spacing will be "normal" for the typeface(s) used, and text will be centered vertically within all sign "strips."

E2.2.2.2.3.4. Type sizes vary depending upon application.
