Colonel Herbert R. Haar, Jr., C. E.  
District Engineer, Department of the Army  
New Orleans District Corps of Engineers  
P. O. Box 60267  
New Orleans, Louisiana 70160

Dear Colonel Haar:                      Re: Docket 1764 COPW Resolution  
   U. S. House of Representatives  
   Interim Hurricane Protection  
   East Bank, Jefferson Parish

Thank you for your letter of October 9, 1970 relative to a Resolution authorizing a study of interim hurricane protection for Jefferson Parish. Until the Lake Pontchartrain Hurricane Protection Barrier has been completed, we feel that the following are necessary to protect the residents on the East Bank of Jefferson Parish:

1. Increased levee protection at Pump Station No. 1	\$ 250,000.00
2. Increased levee protection at Pump Station No. 3	250,000.00
3. Increased levee protection at Pump Station No. 4	250,000.00
Total	\$ 750,000.00

The increased levee protection proposed for each of the three old pump stations would consist of some type of gated structure which would be closed during extreme tidal conditions and open during normal conditions.

If any additional information is required regarding the recommended gated structure, please contact the firm of Burk & Associates, our Consulting Engineers.

Very truly yours,

*Thomas F. Condon*

THOMAS F. DONELON
