C/Design Memo Br

AV
11 Dec 79
Mr. Stutts/jb/2616

1. Reference is made to the 28 Nov 79 meeting between representatives of Hyd & Hydro Branch, F&M Branch, Design Branch and Design Memo Branch concerning the subject Alternative Plans Investigation.
2. Before the referenced meeting, attendants were requested to review their files to ascertain the amount of work required to complete the subject study. The options that were to be discussed at the meeting would determine whether the remainder of the work would be done in-house or contracted to an outside firm. Attendants all agreed that it would be more desirable to complete the subject Alternative Plans Investigation in-house since so much of the work had already been accomplished. Based on the work accomplished to date and the work remaining, it was estimated that it would require an additional 6 months to complete the study. In accordance with this estimate, the inclosed schedule (Incl 1) was developed and has subsequently been approved by Mr. Chatry.
3. It is requested that each Branch program this work into their overall work load and advise Design Memo Branch of any priority conflicts so that the appropriate adjustments can be made. Notice of conflicts should be furnished to Design Memo Branch as soon as possible but NLT 21 Jan 79.
