MEMORANDUM FOR Commander, Lower Mississippi Valley Division

SUBJECT: Report on Section 116(k) of the Water Resources
Development Act of 1990 (WRDA 90)

1. Enclosed is the subject report submitted in accordance with the February 7, 1991, CECW-PC guidance letter.
2. We concluded that the East Jefferson Levee District and Orleans Levee District seems to be satisfied with the performance of the project to date and generally expect the project to deliver the benefits as envisioned. The Pontchartrain Levee District indicated that since construction has not yet been initiated, no determination of benefits is possible for the St. Charles portion of the project. St. Bernard interests, the St. Bernard Police Jury and Lake Borgne Basin Levee District, have commented extensively and this report focuses primarily on the Chalmette Area. We concluded that enhancement benefits originally projected were only a small percentage of the total benefits and that about 73.5 percent of the total benefits projected already have been or will be achieved.
